## The elegant drawer insert

Compact. Classy.

cuisio

## Individual for all widths

The cuisio insert system for drawers inspires by its elegance and fresh appearance. The exclusive material mix of translucent plastic trays – new in graphite colour – and metal connecting profiles – new in stainless steel look – enhances the value of the interior in any modern kitchen.

With its sophisticated clip connection the system can be flexibly adapted to the different drawer widths. Dividers for inside the cuisio trays allow an optimal utilization of space according to the user's individual needs.

### cuisio drawer insert

- Exclusive overall impression due to material mix of translucent plastic and aluminium
- Straight-line design and trays in different widths allow an optimal space utilization
- High-quality haptics, full sound behaviour thanks to great wall thickness
- Individual interior organisation by means of adjustable dividers
- Lateral sealing lips to fill the complete drawer interior and avoid the ingress of dirt
- Dishwasher-proof
- Adaptable to any drawer type independent of the width
- Special depths on request
- Knife block as accessory
- Practical set package, ready for dispatch
- **cuisio universal:** One insert width for several drawer width. The compartments left and right to the insert provide space to store big items.
