Accessories for ninka waste bin systems

Tidy. Beautiful.

eins2top

The functional accessories system

Kitchen space is valuable, waste and recyclables separation, however, is necessary. Especially below the sink, the storage of items which for practical or aesthetical reasons should not be placed in other cabinets is often problematic. Thus, the task is to combine the separation of biological, paper, residual and compound waste with the storage of other kitchen and cleaning utensils. Here separate storage conditions and hygiene but also the visual aspect are especially important, as the sink base cabinet is the most frequently used cabinet in the kitchen. The new accessories system eins2top fulfills this task excellently. It covers unattractive views and uses the space inside the waste bins that is already available in an economic but extremely versatile way. Thus, the whole waste separation area always looks tidy and beautiful.

eins2top – Functional components

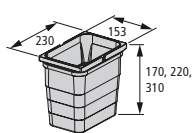

- Additional storage possibilities in an existing space
- Clean and hygienic cover of the waste bins
- Compatible with the ninka waste bin systems eins2vier and eins2fünf
- Neat and tidy overall impression
- Officially rewarded design that is perfectly adapted to the bins
- Made from robust polymer
- **Individual lid:** neatly and securely covers the waste bin
- **Storage tray:** offers additional organization possibilities on the top of the waste bin and serves at the same time as waste bin cover
- **Bio tray:** storage tray combined with a biological filter to neutralize unpleasant smells
- **Dustpan and brush set:** covers the waste bin in a tight and clever way
- **Cleaning set:** consisting of a drying rack for e.g. cleaning rags and bottle inserts for cleaning products such as glass cleaner, ceramic cooktop cleaner, washing-up liquid etc.
