

Ease of use, generous workspaces and well organised storage space, as well as ergonomically focused workspaces. The demands on the kitchen have changed.

It's time for a new system.

Qanto® – the new corner solution.

Planning the optimum kitchen is an art in itself. Every centimeter counts, and in almost every case the planner faces the same challenge: How can kitchens with an L- or U-shaped layout use the inaccessible space in the corners?

Qanto® solves this by providing two or three vertically rising trays for maximum space usage.

Optimum space
planning
and maximum
storage.

Simply
convincing.

Intuitive operation.

It's never been easier to access stored items in the kitchen. It doesn't matter if it's wine, electrical appliance or spices – a simple press of a button and the Qanto® trays rise up.

In addition to its simple operation, Qanto® offers an impressively high degree of safety. Obstructing objects such as a plate or even a hand are recognised and the movement stops immediately.

A more ergonomic kitchen.

Qanto® operates with a linearly driven lifting mechanism to satisfy ergonomic demands and optimise the working environment.

Heavy objects are lifted easily. So Qanto® protects from back strain.

Simply better
for your back.

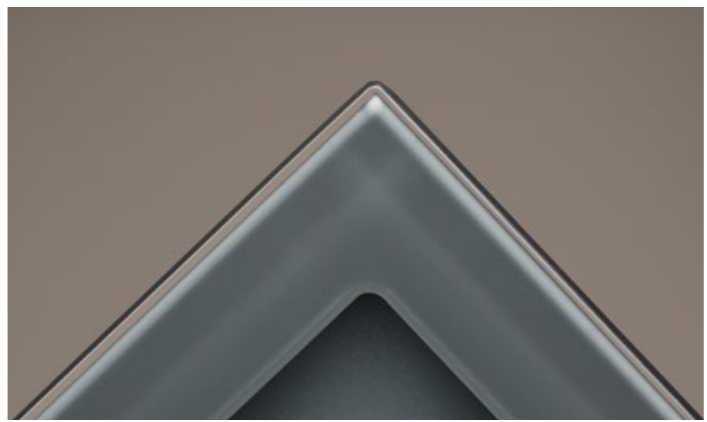

A design that shows the way.

Qanto® harmonises with contemporary style and the design of modern living environments.

The light concept emphasises the high quality materials – function on the inside, emotion on the outside.

The crystal-glass effect of the tray rim defines the elegant design.

Fascinating details.

Optimum space
planning and
maximum
storage.

Plug and Play.

The Qanto® corner cabinet is pre-assembled for easy
integration into built-in kitchens.

Just plug it in – finished.

Simply
convincing.
